Professional Experience

Senior Product Manager - Datadog

(April 2023 - Present) - New York, NY

- Launched zero-to-one Fleet Automation platform used monthly by 8,000+ SREs to centrally govern and remotely manage Datadog Agents across 16,000+ customer environments
- Drove Datadog Agent adoption from 3.2M to 3.7M+ deployments across 20,000+ customers by optimizing distribution and install workflows
- Redesigned Datadog onboarding with AI-powered UX flows to simplify setup, personalize guidance, and drive adoption across prospects, SMBs, and enterprise customers

Co-Founder and CEO - Pesto Health

(May 2022 - April 2023) - New York, NY

- Founded and grew a cash-flow-positive telehealth platform, enabling 10+ providers to launch and operate remote care practices
- Negotiated and secured insurance contracts with Aetna, United, and Medicare, unlocking access to 40M+ covered patients for partner providers
- Established referral partnerships with 3+ universities to streamline patient acquisition and drive provider growth

Product Manager - PathAI

(January 2021 - June 2022) - New York, NY

- Scaled label collection platform to support \$1M+ in high-quality training data per year using active learning, annotator qualification, and targeted tooling improvements
- Designed data catalog interface and APIs enabling ML teams to search, curate, and build datasets from 2M+ pathology slides for model training and evaluation
- Scaled microtasking platform from 300 to 500+ pathologists and doubled monthly active users by optimizing task design and platform

Technical Product Manager - Google / Verily Life Sciences

(December 2018 - January 2021) - South San Francisco, CA

- Built scalable delivery system that helped coaches and clinicians provide timely, personalized care to 3,000+ patients with chronic conditions
- Built content management system used by 15+ content managers to publish dynamic, role-based protocols across Verily's platform ecosystem
- Improved care team console UX and tooling, enabling coaches to support 50% more patients by increasing efficiency from a 1:100 to 1:150 ratio

Technical Program Manager Intern - Google

(June 2018 - September 2018) - Sunnyvale, CA

Software Engineering Intern - Amazon

(September 2017 - December 2017) - Seattle, WA
